

CQQQ Invesco China Technology ETF

As of Sept. 30, 2018

Fund Description

The Invesco China Technology ETF is based on the AlphaShares China Technology Index (Index). The Fund will invest at least 80% of its total assets in securities that comprise the Index and American depository receipts (ADRs), American depository shares (ADSs), global depository receipts (GDRs) and international depository receipts (IDRs) based on securities in the Index. The Index is designed to measure and monitor the performance of the universe of publicly-traded information technology companies open to foreign investment which are based in China, Hong Kong or Macau. The Fund and the Index are rebalanced semiannually.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

As the result of a reorganization on May 18, 2018, the returns presented reflect performance of the Guggenheim predecessor fund. Invesco is not affiliated with Guggenheim.

5-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
AlphaShares China Technology Index	-	-	-	0.38	22.97
MSCI China Index	2.14	1.01	0.84	0.38	19.20

Fund Inception: Dec. 8, 2009

Shares are not FDIC insured, may lose value and have no bank guarantee.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were

deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The MSCI China Index is an unmanaged index

considered representative of Chinese stocks. The index is computed using the net return, which withholds applicable taxes for non-resident investors.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

Depository receipts involve many of the same risks as a direct investment in foreign securities, and issuers of certain depository receipts are under no obligation to distribute shareholder communications to the holders or to pass through to them any voting rights with respect to the deposited securities.

Investing in securities of Chinese companies involves additional risks, including, but not limited to: the economy of China differs, often unfavorably, from the U.S. in such respects as structure, development, government involvement, wealth distribution, rate of inflation, growth rate, allocation of resources and capital reinvestment, among others; the central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership; and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China.

Stocks of micro-cap companies tend to involve substantially greater risks of loss and price fluctuations than more established companies.

The performance of an investment concentrated in issuers of a certain region or country, such as Hong Kong, is expected to be closely tied to conditions within that region and to be more volatile than more geographically diversified investments.

China A-Shares and China B-Shares are not eligible for inclusion in the Index. China A-Shares are subject to substantial restrictions on foreign investment, while the China B-Share market generally is smaller and offers less liquidity than the categories of securities which may be included in the Index. However, by excluding such shares from the Index, the exposure provided to the Chinese presence in the sector may be more limited than would be the case if the Index included China A-Shares or China B-Shares.

Investments focused in a particular sector, such as industrials, technology and telecommunications, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments. There are risks involved with investing in ETFs,

including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues. Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Beta** is a measure of relative risk and the slope of regression. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during

the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

The fund is not sponsored, endorsed, sold, or promoted by AlphaShares, Inc. ("licensor"). Licensor makes no representation or warranty, express or implied, regarding the advisability of investing in securities generally or in the fund particularly or the ability of the AlphaShares China Technology Index ("index") to track general market performance. Licensor's only relationship to Invesco Capital Management LLC ("licensee") is the licensing of the index which is determined, composed and calculated by licensor without regard to licensee or the fund. Licensor has no obligation to take the needs of the licensee or the shareholders of the fund into consideration in determining, composing or calculating the index. Licensor shall not be liable to any person for any error in the index nor shall it be under any obligation to advise any person of any error therein.
