## Credit Suisse (Lux) Digital Health Equity Fund

a subfund of CS Investment Funds 2 - Class MB USD

### Investment policy

Health care cost to society has risen to levels which are no longer sustainable. This fund invests globally in innovative companies which are driving a revolution in the health care sector through the application of technology. It offers diversified exposure to the digital health universe, which is one of the fastest growing segments in the health care industry. The investment universe comprises three segments: Research & Development, Treatments and Efficiency. The fund invests in "pure-play" digital health companies, which are typically small to mid-sized. The investment objective is long-term capital appreciation from actively managed exposure to this secular growth theme.

### Net performance in USD (rebased to 100) <sup>2)</sup>

According to MiFID standards (Markets in Financial Instruments Directive) no performance figures shall be made available to investors if the product was launched less than twelve months ago.

## Legend

- 4) ESG Rating which is provided by MSCI ESG, is measured on a scale from AAA (highest rating) to CCC (lowest rating). The rating is based on the underlying company's exposure to industry specific sustainability risks and their ability to mitigate those risks relative to their peers. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings.
- 5) For more information on the applied norms-based exclusions please refer to: [www.svk-asir.ch](http://www.svk-asir.ch) © In the absence of suitable and/or liquid equity index futures on ESG indices, the Sub-Fund / Fund may use equity index futures, which refer to traditional indices (non-ESG) in order to reduce various risks, for efficient portfolio management and as a way to gain or reduce market exposure.
- 6) For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to [www.msci.com/our-solutions/esg-investing/](http://www.msci.com/our-solutions/esg-investing/)
- 7) The Overall ESG Quality Score does not correspond directly to the presented underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the Overall ESG Quality Score is adjusted to reflect the industry-specific level of sustainability risk exposure. Since Pillar scores are absolute, and Overall scores are relative, the first cannot be averaged to derive the latter. ESG Themes represent a break-down of individual E, S and G scores. All scores and its' components are rated on a scale of 0-10 (provided by MSCI), where 0 is very poor and 10 is very good.
- 8) ESG Controversies Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. The colour indicator, which spans from red to green, indicates the most severe involvement (red) to the least involved (green) in any controversies. The grey colour indicates where data is unavailable.
- 9) ESG Ratings represents the MSCI ESG Rating breakdown in percentage in an absolute view or relative to a benchmark. GRESB ratings for real estate and secondary risks are not taken into account.
- 10) Low Carbon Transition Score is based on a multi-dimensional risks and opportunities assessment and considers both predominant and secondary risks a company faces. The scale ranges from 0-10 (with 10 representing a potential leader) and is industry agnostic and represents an absolute assessment of a company's position vis-à-vis the transition. On a portfolio level, individual scores are aggregated and compared to the benchmark (if existent).
- 11) Carbon Intensities compares the weighted average emissions intensity per million \$ sales (broken down by GICS sector) between the portfolio and the benchmark. It also displays active GICS sector weights.

## Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- **Credit risk:** Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments have low credit risk.
- **Liquidity risk:** Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- **Counterparty risk:** Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- **Operational risk:** Deficient processes, technical failures or catastrophic events may cause losses.
- **Political and Legal risks:** Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- **Sustainability risks:** Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.
