FUND OVERVIEW

- The Fund aims to maximise total return in a manner consistent with the principles of environmental, social and governance “ESG” focused investing.
- The Fund seeks to gain at least 80% of its investments exposure to equity securities of companies domiciled in, or the main business of which is in, developed countries worldwide. This is achieved by investing at least 80% of its total assets in equity securities and other equity-related securities. The Fund may, when determined appropriate, invest in money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash. The equity-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets).
- The MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund’s investments compared to a fund without such screening.
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
